

## Sustainable Impact Model Portfolio Service (SIMPS)

Cautious | December 2025 | For financial advisers and their clients

### Portfolio description

The **SIMPS Portfolio** range provides a combination of risk-adjusted returns and positive social and environmental change: investing that **does well and does good**. The portfolios aim to achieve capital appreciation whilst reducing investment risk via a diversified, multi asset class portfolio.

The strategy is based on actively managed asset allocations across equities, fixed income, listed alternatives and cash. We invest in funds which align with our investment philosophy; businesses that **minimise controversies**, are well run and are **solving major global social and environmental challenges**.

We updated the names of the SIMPS portfolios in March 2025. **The “low risk” portfolio is now called “cautious.”** Some third-party platforms may still show the old name while updates are being made.

**This quarter** Global stock markets rose by 3% in the final quarter of 2025, extending strong gains from earlier in the year.

Performance was narrowly driven, however, with US equities leading and a small group of companies accounting for much of the advance. Alphabet alone contributed around a quarter of the global increase.

In the US, the Federal Reserve (Fed) cut interest rates twice during the quarter, though policymaking has become more complex. A prolonged government shutdown disrupted the release of key economic data, while tariff-related cost pressures and signs of a softening labour market created a mixed outlook. Fed Chair Jerome Powell has voiced growing concern about employment, echoed by companies reporting weaker demand from lower-income consumers.

Investor enthusiasm for artificial intelligence moderated, with Alphabet a notable exception following updates on its Gemini model. Meanwhile, questions are emerging over how major technology firms are financing AI infrastructure, particularly the use of private debt for large data centre projects.

Trade tensions between the US and China eased, and December also brought tentative progress in Ukraine ceasefire talks, which would be supportive for European markets.

## SDG ALLOCATION

The UN Sustainable Development Goals (SDGs) are the blueprint to achieve a better and more sustainable future for all. To help translate the Goals into the **SIMPS portfolios** we show revenue weighting and overall alignment to the SDGs.

THE SDG ALLOCATION CHART ABOVE REPRESENTS A BREAKDOWN OF THE SPECIFIC SDGS BEING SUPPORTED IN THE PORTFOLIO BY REVENUE WEIGHTING. 39% OF IDENTIFIED REVENUE CAN BE DIRECTLY ATTRIBUTED TO MEETING THE SDGS IN THE SIMPS CAUTIOUS PORTFOLIO. NORMALISED TO 100% IN THE CHART ABOVE.<sup>1</sup>

**SDG ALIGNED REVENUE:** measures the revenue alignment of products and services which support the delivery of the SDGs.

**SDG MISALIGNED REVENUE:** measures the revenue misalignment of products and services. Some businesses may have both aligned and misaligned impacts associated with their services (e.g. a waste management business which focuses on recycling, but sends some material to landfill).

<sup>1</sup> Based on 24% of total portfolio. Excludes government bonds, cash and mortgage-backed securities. Impact data is provided from the following sources: Matter, ClarityAI, underlying companies' latest available public reports and third-party fund holdings as at 31/12/2024. Reporting timetables vary company by company.
